Experience

2017 - 2020

2020 - Now

2022

Media Design, MBO

Nova College, Haarlem

During my studies, I learned to design digital media, such as websites and mobile apps. I created navigational structures, interactive features, and focused on user-friendliness.

Additionally, I received an introduction to photography, animation, and video production.

Communication and Multimedia Design, HBO

Hogeschool van Amsterdam, Amsterdam

This is an advanced follow-up program to Media Design, where I learn similar skills but at a more advanced level.

Internship Van Ons

Amsterdam

During my second year of the Communication and Multi Media Design program, I completed an internship at Van Ons. There, I gained valuable experience working in a team, focusing on Frontend Development, and primarily honing my Visual Design skills.
